

The specially designed drinking lids are part of the series. The lid comes with a small or a large aperture.

The straw holder attachment for the Sure Grip mug keeps the straw firmly in place.

The lid changes colour when the liquid is more than 38° degrees celcius. Keep out of the sunlight.

The easy-to-click-on-handle is fitted on the mug from below. A 2-handle solution is available if necessary.

## Sure Grip Mug

### For small and large hands

Ergonomically designed, easy to hold, even in small or weak hands.

- Available in 8 different colours
- Virtually unbreakable
- Takes both cold and hot drinks
- Dishwasher 130°, microwave and freezer-safe
- Comes with drinking lid with small and large aperture
- Ideal stacking beaker
- Environmentally-friendly PVC-free material

The special drinking tops are perfect for the sure-grip mug – the valve in the top makes a vacuum which makes it easy to drink (suck) while lying down. It is easy to fully control the amount of fluid.

The top is available with a small hole for easy flowing liquids and a bigger hole for thick liquids. Push with two fingers on the two holes in the lid to control the amount of fluid if you cannot suck up the fluid by yourself.

The straw holder attachment for the Sure Grip Mug holds the straw in place on the rim.
